

Using the TickTime Timer

Turn on by pressing any button.

Select time length by putting the timer on its side with the desired amount of minutes you want facing up. The time amount will light up blue and the count down on the display will begin to count down.

To customize the time amount to something other than the predetermined amounts, with the timer upright press M+ and S+ to set the minutes and seconds desired then put timer on it's side to begin counting down.

Adjust volume by pressing the V+ or V- button while in the countdown state.

Turn off by pressing and holding V+ and V- at the same time for 3 seconds.
